

Meeting 0

Lex Janssens

Date:	18 Feb 2025
Subject:	How Stable are Baselines: analysis on the Consistency of Reinforcement Learning Baselines
Mentor:	dr.ir. Á. Serra-Gomez
Project term:	February 2025 – August, 2025
E-mail:	l.p.janssens@umail.leidenuniv.nl

Outcome of previous meeting

-

Results during the last weeks

-

Plans for next weeks

- We discussed the approach of the project, and what every research question entailed. From this enrolled that we need performance results in 4 axis: baseline frameworks, environment (repositories), algorithms, and environment steps.
- Make sure all bureaucracy is in order
- Find popular environments used in baseline framework benchmarking, and note their repository. When collecting, try to find as many hyperparameter configurations that they originally tested on as possible, as to get an overview whether differences are due to these different configurations.
- The plan is to apply this all to 3 axis, and thus start with 1 algorithm, such that we can adjust our hypothesis accordingly. At least 5 seeds must be used. Hyperparameters must be aligned.
